SYNCARBO 45-35-C

Water-soluble pigment based on macromolecular technical carbon black for coloring concrete and mortars based on cement and lime. Liquid form.

Application in dyeing:

- Coloring of concrete products e.g. concrete cubes, concrete slabs, curbs, etc.
- Coloring of architectural and façade concretes.
- Coloring of cement-based and/or lime-based mortars.
- Staining of building components with gypsum-based binder.

Technical data:

Color	Black
Base	Aqueous dispersion of high molecular weight technical carbon black
Physical form	Water dispersion
Density [g/cm ³]	1,25±0,10
Viscosity [mPas]	200-2000
Solids content [%]	About 45

Dosing:

- Recommended: 1 – 10% by weight of cement
- Optimal: 4 – 6% by weight of cement

Packaging:

- Pallet-container - 1000 kg
- 15 kg packaging (non-returnable)
- 100 kg packaging (non-returnable)
- As agreed with the customer
