SYNCARBO 50-40N-C

Water based pigment based on high molecular weight technical carbon black for coloring concrete and cement lime- mortars.

Application in dyeing:

- Coloring of concrete products e.g. concrete cubes, concrete slabs, curbs, etc.
- Coloring of architectural and façade concretes.
- Coloring of cement-based and/or lime-based mortars.
- Staining of buliding components with gypsum-based binder.
- Colouring of mineral cement-lime decorative plasters.

Technical data:

Color	Black
Base	Aqueous dispersion of high molecular weight technical carbon black
Physical form	Water dispersion
Density [g/cm ³]	1,10±0,10
Viscosity of Ford cup 4 mm [s]	40-200
Solids content [%]	About 50

Dosing:

- Recommended: 1 – 8% by weight of cement
- Optimal: 2 – 4% by weight of cement

Packaging:

- Pallet-container - 1000 kg
- 15 kg packaging (non-returnable)
- 100 kg packaging (non-returnable)
- As agreed with the customer.
