SYNCARBO 55-20-C

Water-soluble, hydrophobic liquefying pigment based on high-molecular carbon black for colouring concrete and cement-lime mortars. Liquid form.

Application:

- Coloring of concrete products e.g. concrete cubes, concrete slabs, curbs, etc.
- Coloring of architectural and façade concretes.
- Coloring of cement-based and/or lime-based mortars.
- Staining of buliding components with gypsum-based binder.

Technical data:

Color	Black
Base	Aqueous dispersion of high molecular weight technical carbon black
Physical form	Water dispersion
Density [g/cm ³]	1,20±0,10
Viscosity of Ford cup 4 mm [s]	80-200
Solids content [%]	About 55

Dosing:

- Recommended: 0,1 – 0,5% by weight of cement and/or mortar
- Optimal: 0,1 – 0,2% by weight of cement and/or mortar

Packaging:

- Pallet-container - 1000 kg
- 15 kg packaging (non-returnable)
- 100 kg packaging (non-returnable)
- As agreed with the customer
